

Date: 24-03-2017, Time 9.00 AM -10.30 AM, Venue: ECE Central Seminar Hall

Paper ID	Paper Title
15	Cooperative Spectrum Sharing with Multi-Antenna based Adaptive Hybrid Relay
174	Design and Simulation of a Sierpinski Carpet Fractal Antenna for 5G Commercial Applications
226	Need of Physical Layer Security in LTE: Analysis of Vulnerabilities in LTE Physical Layer
285	Performance Analysis of Incremental Hybrid Decode-Amplify-Forward Cooperative Relaying With Opportunistic Relay Selection Under Rayleigh Fading Channels
315	Spatial Modulation and Spatial Multiplexing Performance Comparison over 3D mmWave Communications
328	Energy Efficiency of JT CoMP Based Green Powered LTE-A Cellular Networks
436	Space-Time Block Based Linear Precoders for Multi User-Massive MIMO Frequency Selective Broadcast Channels
630	A CoMP based LTE-A simulator for Green Communications
678	Performance Analysis Of 16x16,32x32,64x64 2-D Mesh Topologies For Network On Chip application of MIMO
705	Beamforming Investigation for Wireless Communication at 60 GHz
240719	The application of 4G network technology and network behavior
752365	ICT4D: Femtocells Network Versus Wi-Fi network for Mobile Communication
33	Graph-based Resource Allocation scheme in Interference-Restricted Two-Tier OFDMA Femtocell Networks
995	Performance Analysis of Non Orthogonal Multiple Access Technique with Precoding
752	Investigation on Handover Performance Analysis through Control Parameter Configuration in LTE-A HetNet
